

1 Click the Safari menu and select Preferences.

2 Click the "Privacy" tab.

3 **Select your cookie preferences.** You have four choices when it comes to how your cookies are stored:^[6]

- Always block - This will prevent any website from storing cookies on your computer.
- Allow from current website only - This will only allow cookies from the website you are currently visiting. This will block any third-party cookies.
- Allow from websites I visit - This will store cookies for all websites you visit. This is the standard setting to allow the most compatibility with websites. This will block third-party cookies.
- Always allow - This allows all cookies and third-party cookies to be stored. This is the most open but least secure option.

- 1 **Open the Settings app on your iOS device.** You can't adjust Safari's settings from within the Safari app, you'll need to use the Settings app.

- 2 **Tap Safari in the Settings app.** You may have to scroll to find it.

3 Tap the "Block Cookies" option in the Privacy & Security section.

4 Select your cookie storing options. You will have four options to choose from.^[7]
